

## A detailed photograph of a Bird of Paradise flower (Strelitzia reginae) against a white background. The flower features large, bright yellow and orange petals that fan out. Several long, slender, blue and white bracts or sepals extend upwards and outwards from the center. A large, green, pointed bract is visible at the base of the flower, and a green stem extends downwards from the right side.

- El sector comprendido entre las fallas de Chivatá Occidental, Chivatá Oriental y Rodríguez.
- El segmento triangular hundido, limitado por las fallas de Rodríguez (al occidente) y de Jenesano (al oriente).
- El bloque yacente (*subthrust*) de la Falla de Soapaga.
- El bloque yacente (*subthrust*) de la Falla de Rondón Oriental.
